forming second contact hole for a storage node electrode, wherein the second contact hole etched until the first conductive plug of the first layer is exposed;

forming a cylindrical storage node electrode by etching a predetermined portion of the filler film and the silicon film until the surfaces of the first and second capacitor oxide films are exposed to form a cylindrical storage node electrode; and forming a Ta₂O₃ dielectric film covering the storage node electrode and a TiN film for an upper electrode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
